Our Master of Science in Public Administration Program uniquely combines business teaching with applied research. It equips you with skills and knowledge for a management career in the public administration sector.

The adult learner is self-directed. We strongly believe in a work-applied learning approach for this educational program. Knowledge and skills learned should be applied at the workplace.

Benefits
- Promote innovative solution in government or international organizations
- Build new mechanism for sustained policy implementation
- Join a community of action-oriented thinkers and doers.

Admission Criteria

Motivated candidates should have a recognized Bachelor’s degree and have at least 2 years of work experience in the public administration or NGO sector. The program is conducted in English, therefore English language proficiency is a must.

Final Thesis

Students must write an individual thesis on a subject that is related to the public administration sector. The project is conducted under the supervision of a lecturer and must be presented to the academic jury.
